

# ENVIRONMENTAL POLICY

## Toyota Motor Manufacturing Czech Republic, s.r.o.

aims to develop its car manufacturing activities respecting the environment and energy management by applying the following principles. Toyota Environmental Challenge 2050, Toyota Environmental and Energy Management System and Toyota Earth Charter.

### ● Ensure of resources and information

TMM CZ commits to ensure all necessary resources and available information to meet the company goals in relation to the environment and energy management

### ● Efficient use of energy

TMM CZ commits to manage energy in the most economical and efficient way by continuous reduction of energy consumption of equipments and buildings by standardizing processes, introducing new technologies and looking for new opportunities.

Follow Toyota Environmental Challenge 2050 to achieve zero CO2, minimize and optimize water usage, support a society and a system based on recycling and support a future society in harmony with nature.

### ● Continual improvement (Kaizen)

TMM CZ commits to continual improvement on a long-term basis.

This improvement process aims at progressive increase of company performance related to the environment and energy management.

### ● Prevention of pollution

TMM CZ commits to the principle of pollution, placing priority on developing preventive and corrective action plants related to the sources of pollution and their impacts on the environment.

### ● Compliance with legal and other requirements (compliance obligations).

TMM CZ commits to comply with all legislation, regulations and other requirements related to activities interacting with environment and energy.

### ● TMM CZ

aims to educate and train their members to implement the following principles into their work activities:

- Using energy and water efficiently.
- Reducing and recycling of wastes.
